

**Selank** is an immune-stimulatory synthetic peptide analog of the natural immunopeptide taftsin. Taftsin acts in part by stabilizing the natural peptides in the body that are believed to counteract stress response as well as influence the levels of the neurotransmitters - norepinephrine, dopamine, and serotonin which are widely believed to be involved in motivation, focus, and pleasure.

**Selank** acts as a stable neuropsychotropic, antidepressant, and anti-stress drug. It also has a nootropic action, which positively influences the formation of memory and learning processes

Below is a list of the benefits associated with the use of Selank:

- Anti-viral Immuno-stimulatory Effects
- Anti-inflammatory Effects
- Anti-anxiety Effects, Anti-depressant Effects,
- and Anti-stress Effects
- Weight loss Effects
- Anti-glycemic Effects
- Antioxidant Effects
- Anxiolytic Effects
- Antiasthenic Effects
- Blood Pressure Reduction Effects
- Memory Enhancing Effects
- Brain Damage Recovery Treatment Effects:
- Stomach Ulcer Treatment Effects
- Alcohol/Opioid Withdrawal Treatment Effects
